

## REMARKS

As suggested by the Examiner, claim 7 has been revised by this amendment to include the missing antecedent for "said tracking means". The required antecedent had been contained in former claim 2 (now canceled) but inadvertently omitted from the last amendment. By adding this language to claim 7 it is believed that this issue is resolved.

Specifically, claim 7 (added by the last amendment) now contains the substance of former claim 1 with the substance of both former claims 2 and 3 in sub-paragraph (e).

As before, claim 8 depends from new claim 7 and contains the substance of former claim 5, and claim 9 depends from claim 8 and contains the substance of former claim 6.

The Examiner's favorable consideration, followed by a Notice of Allowability, is therefore requested.

Respectfully submitted,

Attorney for Applicant
